Hiring Manager

WSP USA – Buildings Team

1100 Boulders Parkway

Richmond, VA 23225

Dear Hiring Manager,

I'm writing to apply for the Electrical Engineering Intern position with WSP's Buildings Team in Richmond, VA. As a Computer Engineering Student at the University of Virginia Engineering School with experience in leadership, electrical engineering, and interpersonal skills, I'm excited for this opportunity to advance WSP's mission of creating an inclusive, sustainable future.

Through my coursework and projects, I have developed a strong foundation in electrical and digital logic systems and engineering skills. An example of this is the 8-bit CPU in Intel's Quartus II project, which ultimately challenged my technical and problem-solving skills.

Beyond academics, my leadership roles as a YoungLife mentor and Shift Lead at Bruster's strengthened my leadership, teamwork, communication, and organizational skills.

I am eager to contribute to WSP's projects while growing under the guidance of your team. Thank you for your time and consideration—I look forward to the opportunity to interview.

Sincerely,
David Holland
